Omron Connect Benefits

From eliminating manual BP recordings to providing you with insightful data, OMRON connect offers many benefits that will transform the way you manage your heart health.

Connected Effortlessly Using Bluetooth

Using Bluetooth, transfer measurements to your smartphone seamlessly after a simple, guided set-up process.

Access Anytime, Anywhere

Get your latest activity and personal health history at your fingertips through the intuitive dashboard. Share this information with your doctor to receive the most appropriate care.

Greater Insight for Better Heart Health Progress

Heart health data is displayed in clear and insightful graphs to help you better understand your health trends for more effective progress.

Record, Manage and Track Health Data Easily

Record your lifestyle habits, gain personal health insights, get medication reminders and create progress reports instantly that can be shared via email all through the BP diary feature.

Earn Rewards

HealthGift program rewards you with gifts including Grab or grocery vouchers when you measure your blood pressure regularly.

SPECIFICATIONS

Model	HEM-7530T-AP
BP reading display	LCD digital display
Transmission method	Bluetooth® low energy technology
Wireless communication	Frequency range: 2.4 GHz (2400 - 2483.5 MHz) Modulation: GFSK Effective radiated power: <20 dBm
Operation mode	Continuous operation
IP classification	IP 21
Rating	DC6 V 4 W
Power source	4"AA" alkaline batteries 1.5 V
Battery life	Approximately 300 measurements (using new alkaline batteries)
Cuff circumference applicable to the monitor	7" to 17" (170 to 420 mm) (included arm cuff: 9" to 17" (220 to 420 mm)
Internal Memory	Stores up to 90 blood pressure readings
Applied part	Type BF (arm cuff), Type CF (electrodes)
Protection against electric shock	Internally powered ME equipment
Contents	Monitor, Wide-Range D-Ring Cuff, storage case, 4 "AA" alkaline batteries, instruction manual, quick start guide

HOW OMRON COMPLETE CAN HELP?

Gives a clear message if the risk of AF has been detected in patients or not.

OMRON Complete - OMRON'S 1st Home Based Heart Health Monitoring

Measure → Record → Share

TRACK 4 VITAL CONDITIONS

Atria Fibrillation
(AFib)

Tachycardia

Bradycardia

Sinus Rhythm

FEATURES

TWO
@
ONE

ECG(1-L)+ BP

- ◆ Home blood pressure monitor and single lead ECG that gives easy, instant and accurate results

Comprehensive
screening

- ◆ Screens for a wide range of heart conditions (ARRHYTHMIA, NORMAL SINUS RHYTHM, etc.)

Intuitive
reading

- ◆ Intuitive reading: Easy to read results with a clear indicator for normal/abnormal reading.

A resource
for doctor

- ◆ To access cardiac data, understanding patient health better

BENEFITS

BLOOD PRESSURE MONITOR (UPPER-ARM TYPE)

HEM - 7124-IN

INR 2,310/-

Tips For Accurate Measurement

- * Measure at the same time of day every day (Within 1 hour after getting up and before bed-time are recommended)
- * No bathing, drinking alcohol or caffeine, smoking, exercising or eating 30 minutes before taking a measurement
- * Use appropriate arm cuff of small, medium, large & wide size

Correct Posture For Upper ARM Blood Pressure Measurement

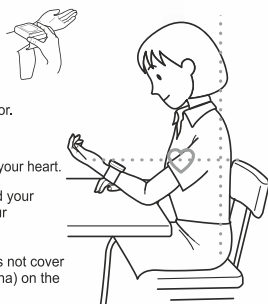

Correct Posture For Wrist Blood Pressure Measurement

- Place the wrist cuff over wrist.
- Your palm should face upward.
- Wrap the wrist cuff around your wrist.
- Sit on chair with your feet flat on the floor.
- Sit upright with your back straight.
- The cuff should be at the same level as your heart.

Relax your wrist and hand. Do not bend your wrist back, clench your fist, or bend your wrist forward.

Note: make sure that the wrist cuff does not cover the protruding part of the wrist bone (ulna) on the outside of the wrist.

Wheeze SCAN

WheezeScan uses **innovative listening technology** to identify wheeze quickly and accurately—so that parents have an in-the-moment tool to help them confirm what you’ve taught them to look and listen for.

Uses advanced algorithm to determine “wheeze” or “no wheeze” after being held below child’s right collarbone for 30 seconds

Clinically validated to identify wheeze with 95% sensitivity and 90% specificity*

Helps parents remove uncertainty anytime, anywhere in the moment of breathing distress and track events and triggers with free companion app

*Clinically validated in trial of 600 children with suspected asthma or bronchitis in which panel of 2 to 3 doctors reviewed sound recordings to determine WheezeScan accuracy. Standard deviation of 0.219 sensitivity; 0.2948 specificity.

*Micron-width diaphragm **detects** low volume wheeze*

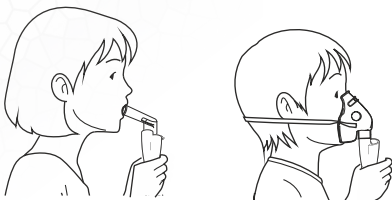

*HD quality microphone & noise-cancelling system allows for **optimal** sound collection*

*Protective casing ensures **durability & long-term accuracy***

*Micro-computer analyzes **breathing sounds***

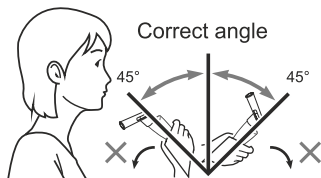

HOW TO USE NEBULIZER

Caution:

Do not tilt the nebulizer kit at an angle of greater than 45 degrees in all directions. Medication may flow into the mouth or it may result in not nebulizing effectively.

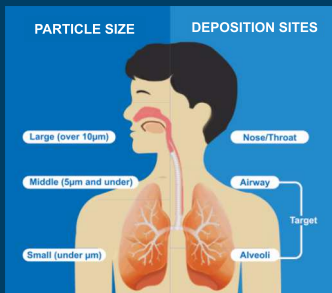

IMPORTANCE OF PARTICLE SIZE

ERS

Recommendation

European Respiratory Society recommends particle size (MMAD) as the most important parameter for selecting a nebulizer

Why is MMAD important

Nebulizer creates an aerosol with a range of particle sizes and MMAD is the median diameter of the aerosol particle, which ensures efficient delivery of medication.

MESH NEBULIZER

360° USABILITY

Unique 360° design allows for use in any position without spillage.
