ABOUT BRAND

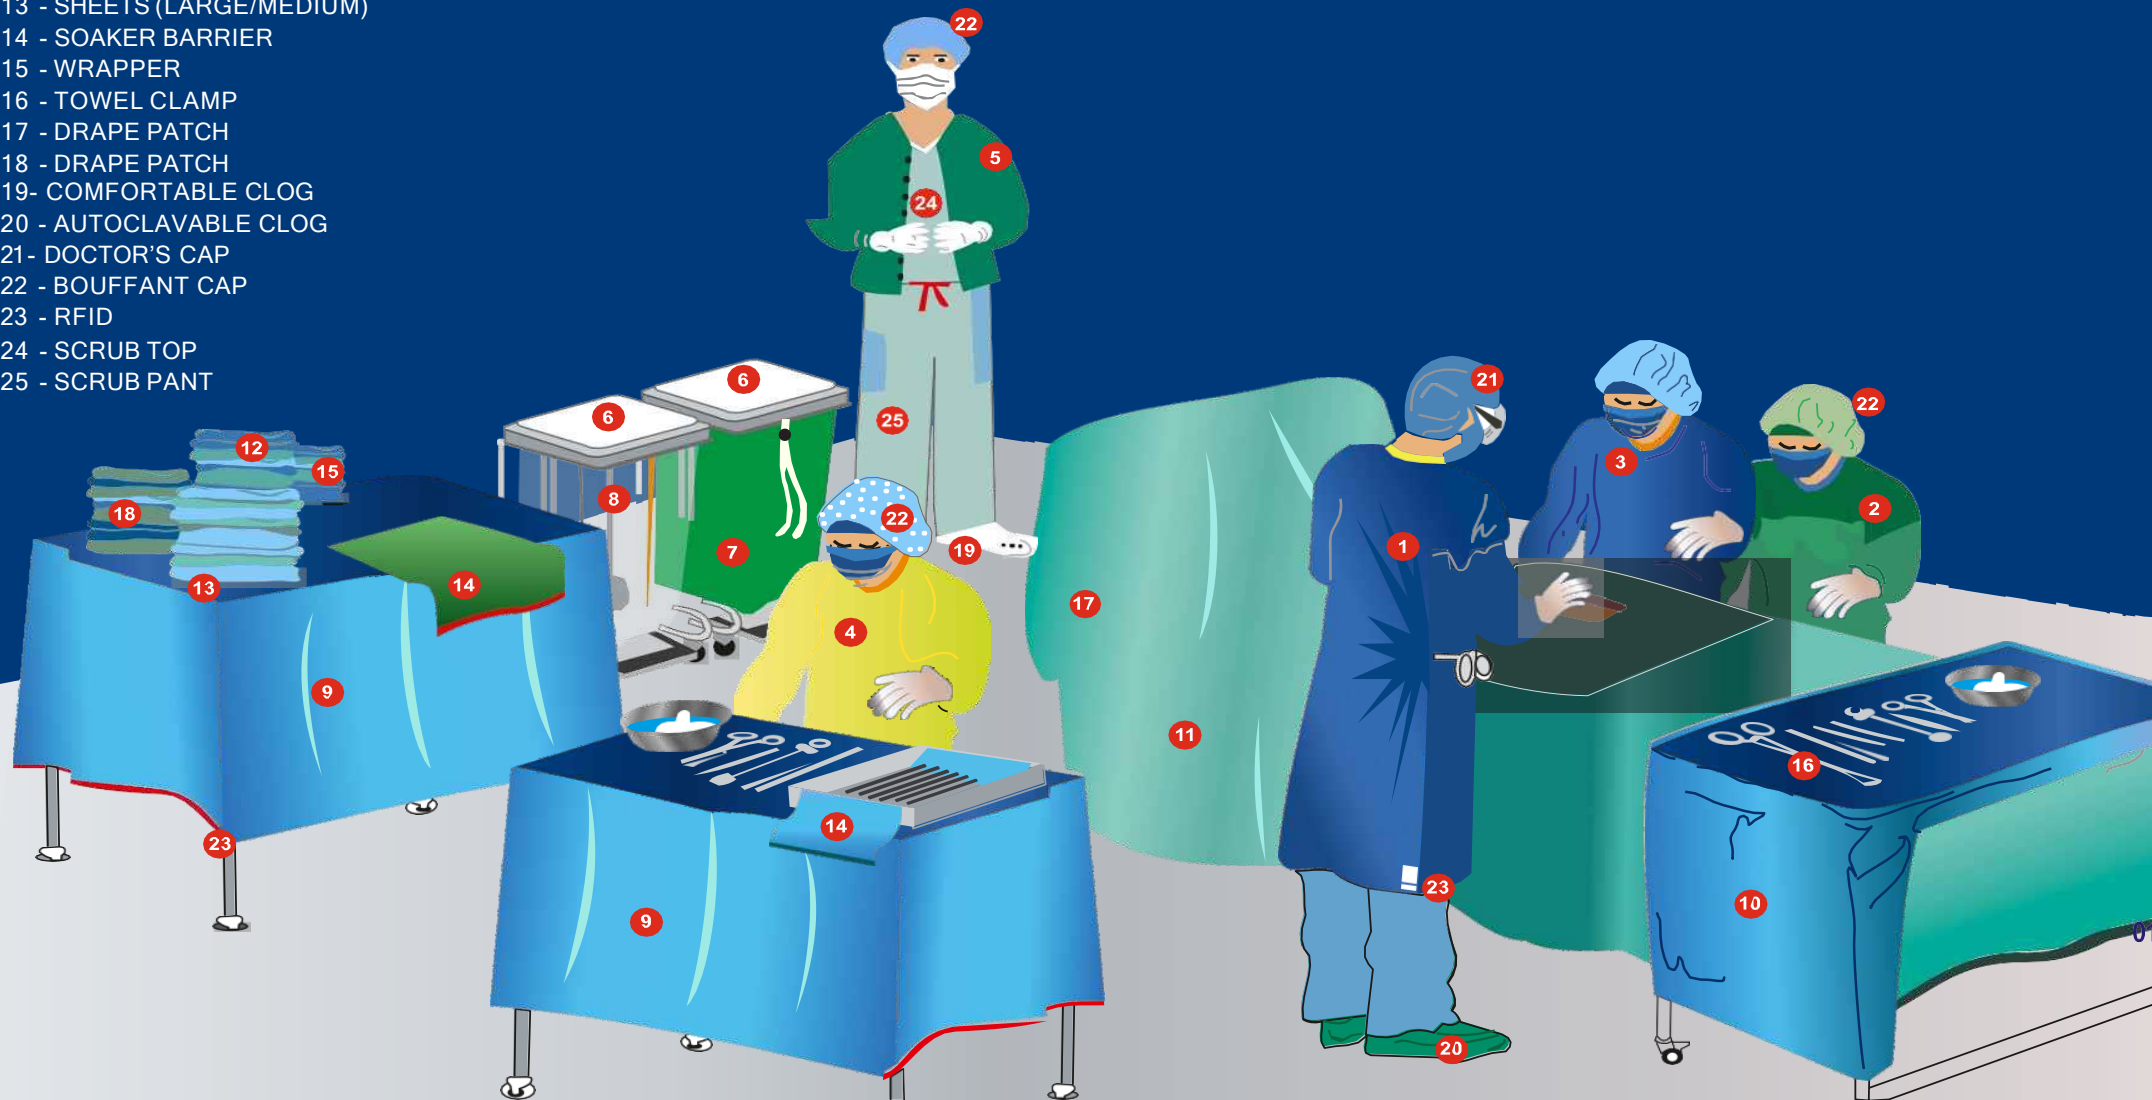

Every morning as the sun rises, Doctal is behind the scenes cleaning, preparing, and delivering the linen that helps healthcare professionals provide the best care to their patients: fresh sheets, warm blankets, comfortable gowns, clean towels, scrubs, and pressed uniforms. We do it proudly because we know our customers are a vital resource to the community and frontline workers. They stand ready to receive those who need care and therefore so do we. For more than 3 years, our group run business has been leading the way in the medical uniform and linen rental industry. Our unflagging attention to detail results in a better experience for our customers and their patients. We continue to innovate and automate to provide the kind of products and service that has become the unreviled standard. We don't make idle promises, we don't cut corners, we always strive to exceed expectations so that when it comes to laundry, linen, and uniforms, Doctal gives you a competitive advantage. It's what our group has done since last 3 years. It's what we plan to keep on doing!

SURGICAL GOWNS

PLAIN SURGICAL GOWN Sterile surgical gowns are worn as a **barrier to fluid and microbial transmission during surgery**. They have long sleeves with elastic cuffs and they maintain the sterile barrier between the surgical field and the surgeon's clothes or exposed arms.

Partly Impervious Blockade Surgical Gown

Fabric provides an exceptional barrier that is highly fluid-resistant while maintaining breathability and comfort. Blockade fabric is a taffeta weave produced with untwisted continuous filaments and is 99% polyester with 1% carbon.

PROTECNO GOWNS

PROTECNO Medical fabric has unique liquid repellence and filter out the air borne skin particles and offer protection from liquid contamination. The fabric is light weight, permanent anti-static, breathable, reusable and environmentally friendly.

PATIENT APPAREL

These hardworking gowns accommodate telemetry monitoring with ease. An off-center breast telemetry pocket allows wires to pass through a buttonhole inside the pocket, staying out of sight. The oversized pocket conceals monitor from view IV sleeves fasten with three stainless steel/Plastic floating ring snaps Gown is generously cut with a 66 sweep, 51Length, & 5" in-Sleeve Tieside closure provides complete patient modesty. All ties are 100% polyester twill tape and reinforced to the body of the gown for added durability

PEDIATRIC APPARELS

Young children seldom like being dressed, so select garments that are easy to put on and take off. Comfort is an important factor to consider when selecting children's clothing. There are three main aspects of comfort to consider.

- 1) **Temperature:** Clothing can cause children to be uncomfortably warm or cool. Comfortable clothing will allow absorption and ventilation so that body moisture can evaporate easily. Cotton and cotton blend fabrics are absorbent and comfortable for small children
- 2) **Restriction:** Children do not enjoy wearing clothing that restricts body movement
- 3) Allow ventilation, yet give warmth;
 - Mold to the shape of the body without restricting body movement
 - Are soft against the skin

MATERNITY CLOTHING

DOCTAL are perfect to snuggle up in before and after your delivery! Gorgeous design with lace trim, made with a super soft material. The perfect weight to keep you comfy and cosy to brave the freezing temps at the hospital!

MATERNITY / FEEDING PATIENT APPARELS

Most Comfortable Smart and Elegant Maternity Dress for every **MOM**, Made with Finest Quality of Breathable **HOSIERY** Fabric to give you the smoothest touch and **SKIN-FRIENDLY MATERIAL** carefully hand designed to fit your changing body shape During and Post pregnancy. This dress is great to wear at work, Events and Even Maternity Photoshoot Dress. **AVAILABLE IN TOPS & GOWNS BOTH THIS IS PURELY ECO-FRIENDLY MATERIAL.**

Colors Available

INFANT APPARELS

Choose new born clothes that are easy to put on and off, comfortable for baby to wear and easy to wash.

- DOCTAL'S Sun-protective clothing with an **ultra violet protection factor (UPF) rating of 50+** gives your child the best protection from the sun.
- **DOCTAL COTTON Fabric** helps protect skin from the sun. Hold the fabric up to the light to see how much sun gets through. If the fabric lets a lot of light through, it'll probably let a lot of UV through too.
- Long sleeves and long pants cover up more skin. Elbow-length sleeves and knee-length shorts are best if it's too warm for full-length clothing

HOW MANY CLOTHES DO NEWBORNS NEED?

You'll need plenty of changes of clothes. As a guide, the following will see you through for a newborn baby:

- ▶ six singlet's
- ▶ six jumpsuits
- ▶ two jumpsuits for night wear
- ▶ three tops
- ▶ two cardigans or jackets (if it's winter)
- ▶ an infant sleeping bag (as an alternative to wraps)
- ▶ a few pairs of socks & HANDGLOVES
- ▶ 5 PAIRS OF TOP & NAPPY & COTTON CAP
- ▶ PAIR OF BLANKET

MATERIAL PROCUREMENT

ANTI-MICROBIAL POLY COTTON FABRIC

Functionalization of textile fabrics with metal oxide nano particles can be used to add antibacterial and moisture management properties to them. Current work focuses on the development of these properties on polyester/cotton woven fabrics by treating them with zinc oxide nano particles for work wear and sportswear applications. Zinc oxide nano particles, prepared by sol-gel method, were applied on fabric samples, which were then tested for antibacterial and moisture management properties

PV SUITING MATERIAL (POLY VISCOSE)

These fabrics are appreciated for its anti-shrinkage, wrinkle free fabric, colour fastness and anti-piling property with the ratio of 67% poly & 33% cotton & also available in blend

PC SHIRTING MATERIAL

Poly cotton – sometimes known as polycot or poly-cotton - **is a blend of natural cotton and synthetic polyester**. The blend mixes cotton fibres with artificially made polyester fibres. Usually, the mix has a ratio of 67% cotton and 33% polyester

100% COTTON FABRIC

Casement Cotton is a sheer fabric that is affordable and comes in a whole range of colours. It is light in weight, but its plain weave texture makes it slightly heavier than cotton, draping more gracefully. Depending on the thickness of the fabric will depend on how much light is let through, making it a perfect application for backing for heavy drapery and backdrops. Casement Cotton is also ideal for a one-off show, to decorate exhibitions or dress marquees because of its low cost and variation of semi-sheer, translucent or opaque properties. From yellow to ice blue, to white and black, we stock a whole variety of colours that leave you feeling spoilt for choice. They are all dry clean only and care should be taken to ensure there are no spillages on the fabric

MAXIMA MEDICAL BARRIER FABRIC

T-190 PARACHUTE MATERIAL

MACHINE PROCUREMENT AND STITCHING QUALITIES

DOUBLE NEEDLE LOCK STITCH MACHINE :

A double needle lockstitch machine works on the same principle as the single needle machine by using two needles and two bobbins thus resulting in two parallel rows of lockstitch. This technique of twin needle sewing is also popularly known as double needle sewing. The distance between the two stitch lines depends upon the distance between the two needles on the needle bar which can be adjusted. Applications include sew box pockets in jackets, light jeans, pyjamas and many more.

COVERSTITCH / FLATLOCK / INTERLOCK MACHINE :

A coverstitch is the twin or triple needle stitching you see on the hems of most ready-to-wear knit garments. The top looks like parallel rows of straight stitching and the underside looks like serger loops, which 'covers' the turned down raw edge. The most basic coverstitching involves folding over the hem of a flat piece of fabric to the 'wrong side, and coverstitching from the right side, catching the hem underneath.

BARTACKING MACHINE :

Bartacking is a type of reinforcement stitching that is done using a Bartack machine. This technique is used by the fabric and textile industries to fortify stress points in clothing, sporting equipment, uniforms, and a host of other products. The Bartack sewing machine stitch is a tight zigzag pattern repeated perpendicularly over itself several times to make sewn products stronger, and resistant to tears or rips in the seams. Stress points that require bartacking are the areas of a garment where normal wear will cause strain on the seams or fasteners.

**SAFETY STITCH / OVER LOCK MACHINE :**

An Overlock is a kind of stitch made using an overlock sewing machine that sews over the edge of one or two pieces of cloth for edging, hemming or seaming. Usually, an overlock sewing machine will cut the edges of the cloth as they are fed through (such machines being called "Sergers or serger sewing machine"), though some are made without cutters. Loopers serve to create thread loops that pass from the needle thread to the edges of the fabric so that the edges of the fabric are contained within the seam commonly known as edging, hemming and seaming a variety of fabrics and products.

EMBROIDERY SOFTWARE :

If you are serious about embroidery and multi- decoration, Wilcom is your answer. Using the industry's preferred EMB file format, Wilcom provides Embroidery Digitizing Software for apparel decoration design, embroidery editing, lettering and even easy ways to manage the process and get customer approvals. No matter what part of the embroidery process you are involved with, there's always an embroidery editing software for you.

**MULTIHEAD COMPUTERIZED EMBROIDERY :**

The latest Computerized Embroidery Technology is now available by Isharkmart, a leading affordable Technology supplier. These Embroidery machines come in multiple options from 1-36 Heads. Other options include Boring, Sequin, Cording, Beading, Laser Device, Chenille & Standard Embroidery are possible on these machines. Isharkmart Embroidery machines are used for a variety of Embroidery applications which includes Embroidery on various Fabrics, Panels, Knitwear, Logo Embroidery on T-Shirts, Caps, Shoes, Bags, Curtains and other Home furnishing items. Isharkmart machines are synonymous for their good quality, affordable cost and reliable service across India.
